Light-Weight Professional Guide Bars

These completely re-designed professional light-weight guide bars are lighter, stronger and longer lasting. Designed for top performance for professional woodcutters.

Recommended Saw Sizes

Up to 2.3 – 4.0 cu. in (38 – 65 cc)

Built-in Performance

LIGHTER

- 1 More precise cutting from a stiffer bar
- 2 20% lighter with new aluminum core*
 - Provides better balance on smaller saws
 - Less fatigue

STRONGER

- 3 Designed to be stiffer and stronger than other light-weight bars*
- 4 Longer nose life and better performance with a new sprocket nose system
 - To resist spreading and wear, an all new bearing-grade steel sprocket nose assembly

LONGER-LASTING

- 5 LubriTec™ keeps your chain and guide bar oiled, for less friction and longer life
- 6 Precision-metered severe service grease
- 7 New UV paint process prevents paint in the bar groove, and maintains accurate gauge through working life
- 8 Added protection in tough environments with debris shield
- 9 Better fit-up and reduced wear from precision bar grooves

*Compared to an Oregon Pro-Lite bar

SpeedCut

Perfect for professionals who cut high volumes of wood. The narrow kerf system requires less power so your cuts are much faster. SpeedCut lives up to its name because of its lighter weight, durability, and best-in-class efficiency.

VersaCut

Ideal solution for arborists, orchardists, and other professionals who encounter every type of tree, shrub, or limb during their work day. VersaCut has the versatility and durability for your ever-changing environment.

ControlCut

Made for the work days when you encounter a dozen small jobs and a few larger ones. ControlCut gives you the freedom to use one tool, rather than two or three. The guide bar's smaller-radius nose reduces kickback for smooth cutting.
